

Please do not allow the banking industry to weaken the Indiana No Call list. I think that by allowing the banking industry a backdoor into getting around the No Call list you would be taking away my rights to say "NO! I do not want to be bothered by solications". I feel that I should have this right as well as the banking industry as well as other industries should respect the fact that I have made this decision. I have to say that this law works and should stay intact!
